MT-GG-02-Geo.json

State

Montana

Legislative

U.S. House

Added to PlanScore

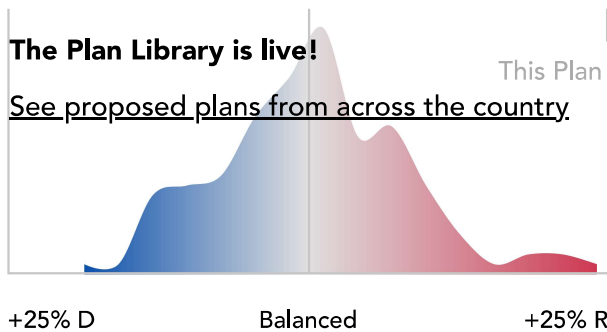

Feb. 1, 2022

This plan has 2 seats. Fairness metrics for plans with fewer than seven seats should be interpreted with great caution.

PlanScore bases its scores on predicted precinct-level votes for each office (State House, State Senate, and U.S. House) built from past election results and U.S. Census data. [More information about the predictive model used to score this plan.](#)

Charts and Graphs

Efficiency Gap: 28.5% R

Votes for Republican candidates are expected to be inefficient at a rate 28.5% R lower than votes for Democratic candidates, favoring Republicans in 92% of predicted scenarios.* [Learn more](#) >

Sensitivity Testing

Sensitivity testing shows us a plan’s expected efficiency gap given a range of possible vote swings. It lets us evaluate the durability of a plan’s skew.

Declination

Declination is only shown where both parties each win one or more seats in a sufficient number of predicted scenarios* .

Partisan Bias

The parties’ statewide vote shares are 41.5% (Democratic) and 58.5% (Republican) based on the model. Partisan bias is shown only where the parties’ statewide vote shares fall between 45% and 55%. Outside this range the metric’s assumptions are not plausible.

Mean-Median Difference

The parties' statewide vote shares are 41.5% (Democratic) and 58.5% (Republican) based on the model. **The Plan Library is live!** mean-median difference is shown only where the parties' statewide vote shares fall between 45% and 55%. [See proposed plans from across the country.](#) Outside this range the metric's assumptions are not plausible.

Freedom to Vote Act Races

[Section 5003\(c\)\(3\) of the FTVA](#) specifies that partisan fairness should be assessed using a state's two most recent elections for U.S. President and two most recent elections for U.S. Senate.

U.S. President 2020: 33.2% R

Under this plan, votes for the Republican candidate were inefficient at a rate 33.2% R lower than votes for the Democratic candidate.

U.S. President 2016: 27.8% R

Under this plan, votes for the Republican candidate were inefficient at a rate 27.8% R lower than votes for the Democratic candidate.

U.S. Senate 2020: 40.0% R

Under this plan, votes for the Republican candidate were inefficient at a rate 40.0% R lower than votes for the Democratic candidate.

U.S. Senate 2018: 3.7% R

Under this plan, votes for the Republican candidate were inefficient at a rate 3.7% R lower than votes for the Democratic candidate.
