Districts 2021-11-16.json

State

Louisiana

Legislative

U.S. House

Added to PlanScore

Nov. 16, 2021

This plan has 6 seats. Fairness metrics for plans with fewer than seven seats should be interpreted with great caution.

PlanScore bases its scores on predicted precinct-level votes for each office (State House, State Senate, and U.S. House) built from past election results and U.S. Census data. [More information about the predictive model used to score this plan.](#)

Charts and Graphs

Efficiency Gap: 3.4% D

+25% D Balanced +25% R

Votes for Democratic candidates are expected to be inefficient at a rate 3.4% D lower than votes for Republican candidates, favoring Democrats in 65% of predicted scenarios.* [Learn more](#) >

Sensitivity Testing

Sensitivity testing shows us a plan’s expected efficiency gap given a range of possible vote swings. It lets us evaluate the durability of a plan’s skew.

Declination: 0.06 R

+0.81 D Balanced +0.81 R

The difference between mean Democratic vote share in Democratic districts and mean Republican vote share in Republican districts along with the relative fraction of seats won by each party leads to a declination that favors Republicans in 56% of predicted scenarios.* [Learn more](#) >

Partisan Bias

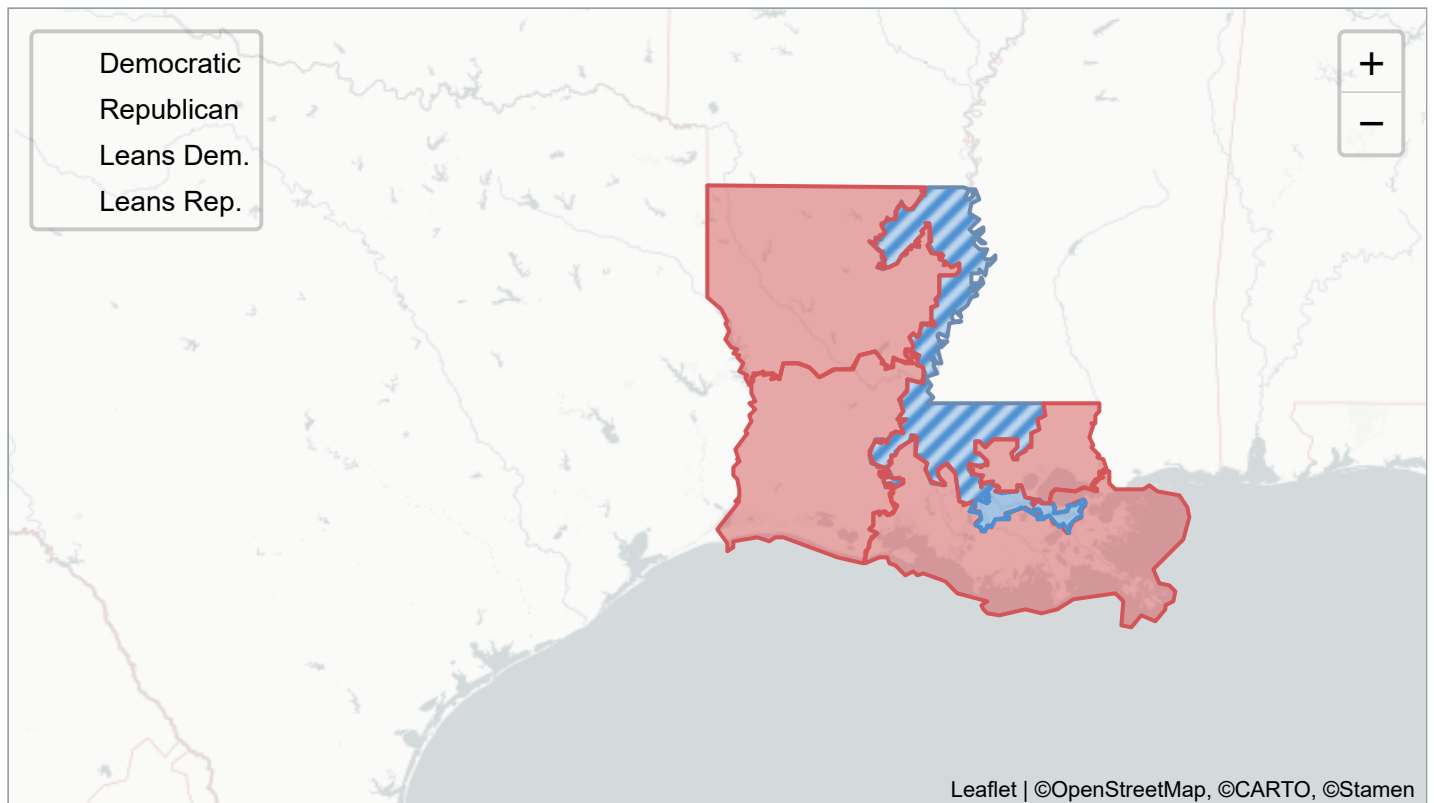

The parties' statewide vote shares are 38.0% (Democratic) and 62.0% (Republican) based on the model. Partisan bias is shown only where the parties' statewide vote shares fall between 45% and 55%. Outside this range the metric's assumptions are not plausible.

Freedom to Vote Act Races

[Section 5003\(c\)\(3\) of the FTVA](#) specifies that partisan fairness should be assessed using a state's two most recent elections for U.S. President and two most recent elections for U.S. Senate.

U.S. President 2020: 2.3% D

Under this plan, votes for the Democratic candidate were inefficient at a rate 2.3% D lower than votes for the Republican candidate.

U.S. President 2016: 3.7% D

Under this plan, votes for the Democratic candidate were inefficient at a rate 3.7% D lower than votes for the Republican candidate.

U.S. Senate 2020: 10.2% D

The Plan Library is live!

Under this plan, votes for the Democratic candidate were inefficient at a rate 10.2% D lower than votes for the Republican candidate. See proposed plans from across the country.

U.S. Senate 2016: 4.6% D

Under this plan, votes for the Democratic candidate were inefficient at a rate 4.6% D lower than votes for the Republican candidate.

* Scenarios are part of the predictive model used to score this plan.

† 50%+ chance of one or more party flips assuming the plan is used for one decade with five State House elections, five U.S. House elections, or three State Senate elections.

‡ Enacted U.S. House, State House, and State Senate plan metrics are featured in our historical dataset.
