Votes for Democratic candidates are expected to be inefficient at a rate 0.8% D lower than votes for Republican See proposed plans from across the country

candidates, favoring Democrats in 52% of predicted scenarios.* Learn more >

Sensitivity Testing

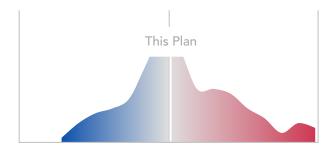

Sensitivity testing shows us a plan's expected efficiency gap given a range of possible vote swings. It lets us evaluate the durability of a plan's skew.

Declination: 0 R

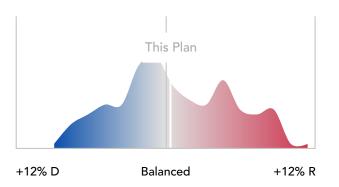

The difference between mean Democratic vote share in Democratic districts and mean Republican vote share in Republican districts along with the relative fraction of seats won by each party leads to a declination that favors Republicans in 52% of predicted scenarios.^{*} Learn more >

Partisan Bias: 0.4% R

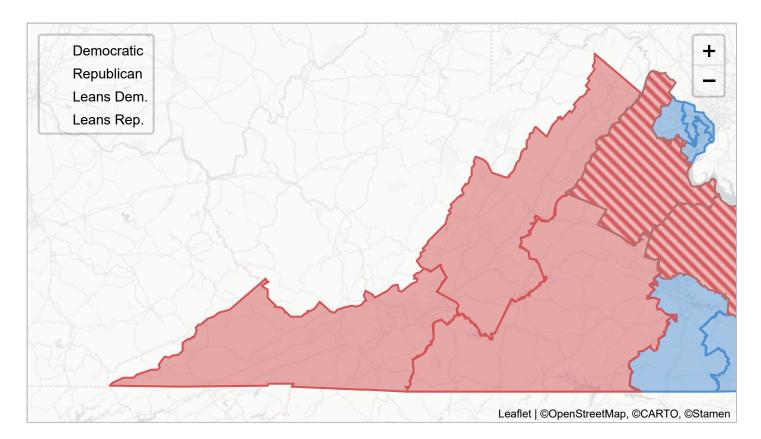

+25% D Balanced +25% R **The Plan Library is live!** Republicans would be expected to win 0.4% R extra seats in a hypothetical, perfectly tied election, favoring <u>See proposed plans from across the country</u> Republicans in 57% of predicted scenarios. Learn more

Mean-Median Difference: 0.4% R

The median Republican vote share is expected to be 0.4% R higher than the mean Republican vote share, favoring Republicans in 57% of predicted scenarios.^{*} Learn more >

Freedom to Vote Act Races

<u>Section 5003(c)(3) of the FTVA</u> specifies that partisan fairness should be assessed using a state's two most recent elections for U.S. President and two most recent elections for U.S. Senate.

U.S. President 2020: 5.8% R

Under this plan, votes for the Republican candidate were inefficient at a rate 5.8% R lower than votes for the Democratic candidate.

U.S. President 2016: 10.2% R

Under this plan, votes for the Republican candidate were inefficient at a rate 10.2% R lower than votes for the Democratic candidate.

U.S. Senate 2020: 1.5% D

Under this plan, votes for the Democratic candidate were inefficient at a rate 1.5% D lower than votes for the Republican candidate.

U.S. Senate 2018: 2.7% R

Under this plan, votes for the Republican candidate were inefficient at a rate 2.7% R lower than votes for the Democratic candidate.

^{*} Scenarios are part of <u>the predictive model used to score this plan</u>.

[†] 50%+ chance of one or more party flips assuming the plan is used for one decade with five State

House elections, five U.S. House elections, or three State Senate elections.

[‡] Enacted <u>U.S. House</u>, <u>State House</u>, and <u>State Senate</u> plan metrics are featured in our <u>historical</u> <u>dataset</u>.
